DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1,2,6,7,11,12,16,17** are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Seidel (4,383,316).

With regard to claim 1, Seidel discloses a method of transmitting data from a source system to a target system ("**...the transmission of a high-speed serial data stream between an originating end and a terminating end...to a predetermined plurality of lower-speed channels**", col. 1, lines 42-47) over a network, comprising the steps of:

determining whether the number of packets ("**If a customer wants to transmit facsimile information ... about 1 Mb ...**", col. 2, lines 50-53) exceeds a threshold number (**each channel can carry information at the rate of 64 kb/s, col. 2, line 55**); and

transmitting the packets (**data message block, col. 2, lines 20-21; see also Fig. 1**) in parallel (**e.g. 18 channels, col. 2, line 59**), if the number of packets exceeds

in the threshold number (**1M > 64**), each packet having an indicium (**header block, col. 2, line 20; see also Fig. 2**) for properly reconstructing the data by the target system (**see also “... in response to these identification signals ... to restore the original high-speed serial data”, col. 1, lines 54-61**).

With regard to claim 2, Seidel further discloses a plurality of network connections that are established to transfer the packets in parallel (**e.g. 18 channels, col. 2, line 59**).

With regard to claims 6,11,16, see analysis for claim 1.

With regard to claims 7,12,17, see analysis for claim 2.

Allowable Subject Matter

4. Claims 3-5,8-10,13-15,18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
